What are the risks of investing?

Risk indicator¹ for Cash Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler/.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five year period to 31 March 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

Notes

1. This fund was launched on 16 August 2023. We first calculate the risk indicator using market index returns data for periods before that date, and actual fund returns data afterwards. However, using market index returns means that the risk indicator may provide a less reliable indicator of potential future volatility. So, if a fund mainly invests into another fund with a different risk indicator, we may adopt that number if we consider it is a more reliable indicator of the potential future volatility of the fund.
2. These charges are inclusive of GST if applicable.
3. The manager's basic fee is made up of a flat Forsyth Barr fee of 0.85% plus an underlying fund fee of 0.25%. We are also the manager of the underlying fund.
