Tech Fund

Fund update for quarter ending 30 September 2026

What is the purpose of this update?

This document tells you how the Tech Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Forsyth Barr Investment Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Tech Fund aims to track the investment performance of a market index comprised of companies in the technology sector, and other selected companies within the communication services and consumer discretionary sectors, by investing in an international passively managed exchange traded fund (or funds).

Total value of the fund	$6,543,973
The date the fund started	16 August 2023

What are the risks of investing?

Risk indicator[1] for Tech Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler/.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating. This risk indicator is not a guarantee of a fund's future performance.

The risk indicator is based on the returns data for the five years to 30 September 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

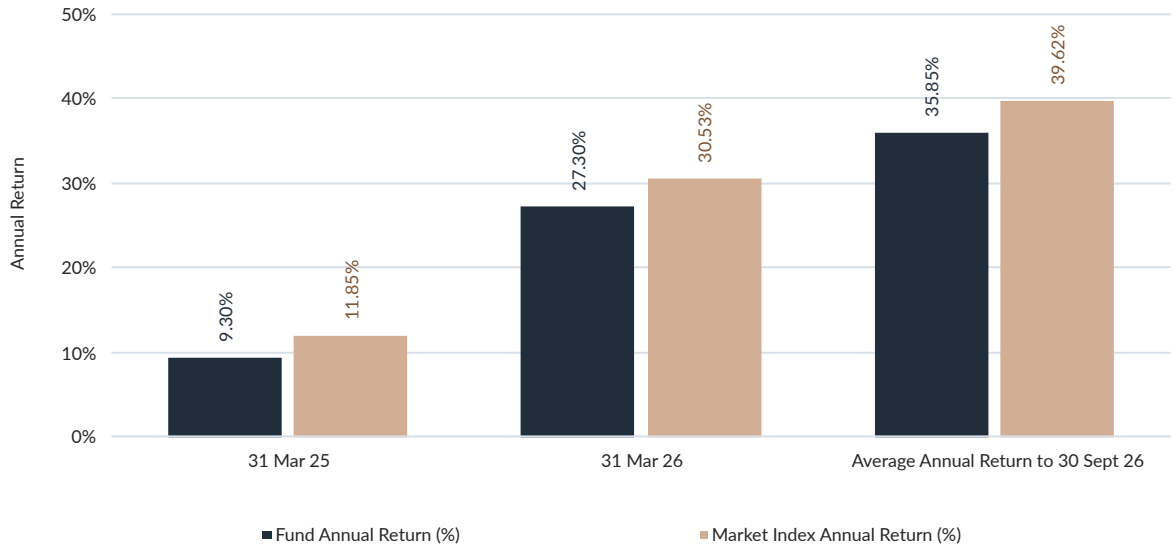

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	35.23%
Annual return (after deductions for charges but before tax)	36.85%
Market index annual return (reflects no deduction for charges and tax)	38.59%

The market index return is based on the S&P North American Expanded Technology Sector Index (USD) Total Return Index unhedged to the New Zealand dollar. Additional information about the market index is available on the Forsyth Barr Funds' entry on the offer register at www.disclose-register.companiesoffice.govt.nz.

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2026.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Tech Fund are charged fund charges. In the year to 31 March 2026 these were:

	% of net asset value[2]
Total fund charges	**1.24%**
Which are made up of:	
Total management and administration charges including	**1.24%**
Manager's basic fee	0.85%
Other management and administration charges[3]	0.39%
Total performance-based fees	**0.00%**
Other Charges	Dollar amount per investor
	$0.00

Investors may also be charged individual action fees for specific actions or decisions (for example for withdrawing from or switching funds), although these are not currently charged. See the Product Disclosure Statement for more information about fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

> EXAMPLE OF HOW THIS APPLIES TO AN INVESTOR
>
> Phoebe had $10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Phoebe received a return after fund charges were deducted but before tax of $3,685 (that is 36.85% of her initial $10,000). This gives Phoebe a total return after tax of $3,523 for the year.

Notes

1. This fund was launched on 16 August 2023. We first calculate the risk indicator using market index returns data for periods before that date, and actual fund returns data afterwards. However, using market index returns means that the risk indicator may provide a less reliable indicator of potential future volatility. So, if a fund mainly invests into another fund with a different risk indicator, we may adopt that number if we consider it is a more reliable indicator of the potential future volatility of the fund.
2. These charges are inclusive of GST if applicable.
3. These charges include the management fees of underlying funds where we are not the manager. In order to estimate these charges, we take into account the proportion of the Forsyth Barr Fund that is invested in the underlying fund. We also consider the public disclosures for the underlying fund about its management and administration charges. We have assumed that these will not change. We review all these estimates on an annual basis.
