

## Fletcher Building

# FY19 Result — No News is Good News

Fletcher Building's (FBU) stock price bounced on the back of a result that, in our view, provided no new information. Recent weakness suggested some feared bad news, possibly from declining demand in Australia or ongoing construction project delays. There is no change to our investment view — we see a raft of challenges that could cause FBU to disappoint vs. market expectations over FY20, with value insufficient to compensate. Maintain UNDERPERFORM.

#### What's changed?

 Earnings: Minor operating changes, and we factor in the NZ\$300m share buyback. Our forecasts do not yet incorporate IFRS16 impacts.

#### Result effectively preannounced; margin pressure a consistent theme

Not surprisingly, FBU's FY19 result was in line with the headline guidance and detail provided at June's investor day, and minimal new information was provided. The result did serve to reemphasise a few of our concerns:

- NZ EBIT (ex. Construction/Housing) was down -6% on revenue +2% and vs. c.+3% growth in construction activity, with margins pressured by cost and competition. All NZ divisions (Building Products, Steel, Concrete, Distribution) saw EBIT margins fall. We expect these pressures will continue and may be exacerbated by easing demand.
- Homebuilding margins fell to NZ\$111k per house/section, from NZ\$136k, despite 97% of sales being houses (not section only) vs. 86% in the pcp. FBU attributed the lower margins to geographical mix. We suspect FBU will struggle to sustain margins given softening Auckland prices and demand.
- The Building & Interiors (B&I) Construction loss provision is unchanged, but profit contribution to Construction outside Higgins and South Pacific remain minimal. Industry anecdotes and FBU's lack of profit recognition to date suggest its Infrastructure division is also grappling with project challenges.
- The halving of AU EBIT despite flat revenue also emphasised that competition and cost pressures have been principal impacts. FBU's ambition to deliver meaningful earnings improvement, with demand now going backward, feels ambitious.

#### Downside risk to expectations

On a run-rate basis FY19 equates to EBIT of c.NZ\$512m excluding divestments, excess land sales gains, and other one-off impacts. Looking to FY20 FBU has painted a picture of a broadly stable underlying NZ business, with cost savings and efficiency investments delivering growth in AU. The analyst consensus appears to have taken this at face value: FY20E NZ\$539m, range NZ\$470–670m (pre result). This would require a positive swing in momentum at a time when the environment is only getting more challenging. History firmly suggests investors should take a cautious view when evaluating FBU's outlook. We view the risk to our and market expectations as negative.

#### Investment View

We believe FBU will likely disappoint market earnings expectations again in FY20/21. The stock's valuation "discount" vs. sector peers and the broader market masks weak medium-term free cash flow and peak cycle demand. UNDERPERFORM.

## **Investment summary**

Over the past decade FBU has been a perennial disappointer vs. market expectations; unfortunately, we see a high risk of it doing so again over FY20/21 given the plethora of competitive, macro, and operational challenges it faces. Whilst FBU's valuation multiples appear prima facie unchallenging relative to an elevated market, they must be put in context of (1) key cyclical exposures being at near record levels, and (2) weak medium-term cash flow impacted by extended elevated capex and crystallisation of construction losses. UNDERPERFORM.

#### **Business quality**

- Competition pressuring NZ franchises: Whilst FBU's NZ businesses typically maintain leading market positions, over the past decade the strength of these positions has generally deteriorated with increased domestic and import competition pressuring margins and market share (a trend we expect will continue).
- Low quality Australian portfolio: FBU's poor performing Australian businesses currently earn a c.2% EBIT return on the c.NZ\$3b acquisition cost. FBU is aiming to 4x its Australian EBIT over the next five years through improved margins and new investment. We are sceptical given competitive constraints and high operating leverage to slowing demand.

#### Earnings and cash flow outlook

- Consensus expectations too high: Our FY20/21E EBIT is -7%/-7% below (pre result) analyst consensus forecasts, translating through to EPS -11%/-12% under.
- Limited medium-term free cash flow: Forecast medium-term FCF yield: FY20/21/22E -1%/3%/4% reflecting crystallisation of construction losses and capex materially > depreciation.
- Strong balance sheet and capital management: Proceeds from the sale of Formica will lower FBU's net debt to c.0.5x, significantly below its 1.5-2.5x EBITDA target. FBU intends to return "up to NZ\$300m" through an on-market buyback commencing post its FY19 result.

#### Risks factors

- Construction cycles in NZ and Australia: FBU is levered to cyclical construction activity in NZ and AU, weighted to residential in both markets.
- Competitive pressures: Competition and cost inflation could materially influence FBU's market share and margins.
- Construction losses: Consensus view is that company has likely "kitchen sinked" its loss provisions, but the risk will not be extinguished until the projects are complete. Anecdotes of staff losses and project issues persist.

Figure 3. Divisional EBIT

homebuilder.

Company description

FBU is NZ's largest building materials and

construction company. Operations include:

(1) the manufacturing of a broad range of

light and heavy building materials

including cement, aggregates, concrete products, plasterboard, insulation and

plastic pipes in NZ and Australia, (2) two businesses

laminates and panels and roof tiles. (3)

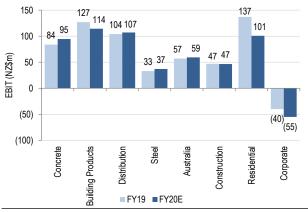

building distribution businesses including

Placemakers (NZ), Mico (NZ) and

Tradelink (Australia), (4) Fletcher Construction, NZ's largest construction

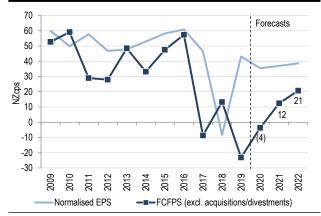

company, and (5) Fletcher Living, a NZ

manufacturing
